

FLEET HOSPITAL OPERATIONS & TRAINING CENTER (FHOTC)  
MISSION ESSENTIAL TASK LIST (METL)

## INDEX OF TASKS

	PAGE
INTRODUCTION	3
METL EMF.01 - PLAN EMF HEALTH SERVICES	
1) TASK EMF.01.01 PLAN FOR HEALTH SERVICES	4
2) TASK EMF.01.02 ESTABLISH MEDICAL/DENTAL CAPABILITY ASHORE	11
METL EMF.02 - PROVIDE EMF HEALTH SERVICES	
1) TASK EMF.02.01 CASUALTY COLLECTION	14
2) TASK EMF.02.02 MEDICAL SUPPLY	15
3) TASK EMF.02.03 CONDUCT DENTAL SERVICES OPERATIONS	17
4) TASK EMF.02.04 LABORATORY	18
5) TASK EMF.02.05 X-RAY	20
6) TASK EMF.02.06 PHARMACY	22
7) TASK EMF.02.07 OPERATING ROOM	24
8) TASK EMF.02.08 PROVIDE PATIENT STABILIZATION AND HOLDING	27
9) TASK EMF.02.09 FIELD PREVENTIVE MEDICINE	
10) TASK EMF.02.10 PATIENT MOVEMENT	31
METL EMF.03 - ADMINISTRATION	
1) TASK EMF. PERFORM MEDICAL ADMINISTRATIVE TASKS	
2) TASK EMF. PROVIDE GENERAL ADMINISTRATIVE SUPPORT	
3) TASK EMF. PROVIDE ADMINISTRATIVE SUPPORT FOR PATIENT MOVEMENT	
 METL EMF.03 - ORGANIZATION	
1) TASK EMF.03. ENSURE COMPLIANCE WITH GENEVA CONVENTION AND LAW OF ARMED CONFLICT DOCTRINE	
2) TASK EMF.03.01 IDENTIFY RAND AND RATE STRUCTURES OF USN/USMC/USA/USAF PERSONNEL	
3) TASK EMF.03.02 IDENTIFY ORGANIZATION STRUCTURE AND CHAIN OF COMMAND WITHIN THE MARINE CORPS AND U.S. ARMY	
4) TASK EMF.03.03 IDENTIFY THE ELEMENTS AND GENERIC EMPLOYMENT MISSIONS OF A MARINE AIR/GROUND TASK FORCE (MAGTF)	
5) TASK EMF.03.04 IDENTIFY THE BASIC ELEMENTS AND GENERIC EMPLOYMENT MISSIONS OF A U.S. ARMY BRIGADE	
6) TASK EMF.03.05 IDENTIFY THE LEADERSHIP TRAITS AND PRINCIPLES OF THE MARINE CORPS	

- 7) TASK EMF.03.06 WEAR THE WOODLAND/DESERT UTILITY UNIFORM
- 8) TASK EMF.03.07 MAINTAIN CLOTHING AND EQUIPMENT
- 9) TASK EMF.03.XX MAINTAIN A PROFESSIONAL PERSONAL APPEARANCE
- 10) TASK EMF.03.08 STAND A PERSONNEL INSPECTION
- 11) TASK EMF.03.09 PARTICIPATE IN PHYSICAL CONDITIONING

METL EMF.04 - FIELD/COMBAT SURVIVAL SKILLS

- 1) TASK EMF.04.01 CAMOFLAGE SELF AND INDIVIDUAL EQUIPMENT
- 2) TASK EMF.04.02 PERFORM BASIC MAP READING
- 3) TASK EMF.04.03 NAVIGATE WITH A MAP AND TERRAIN ASSOCIATION
- 4) TASK EMF.04.04 NAVIGATE WITH A MAP AND COMPASS
- 5) TASK EMF.04.05 PREPARE INDIVIDUAL COMBAT EQUIPMENT FOR TACTICAL OPERATIONS
- 6) TASK EMF.04.06 MAINTAIN THE M9 SERVICE PISTOL
- 7) TASK EMF.03.07 ENGAGE TARGETS WITH THE M9 SERVICE PISTOL
- 8) TASK EMF.03.08 PREPARE A SINGLE-CHANNEL GROUND/AIR RADIO SYSTEM (SINGARS)
- 9) TASK EMF.03.09 COMMUNICATE USING A RADIO
- 10) TASK EMF.03.10 COOK A MEAL READY TO EAT
- 11) TASK EMF.03.11 MAINTAIN THE M40 FIELD PROTECTIVE MASK
- 12) TASK EMF.03.12 DON THE M40 FIELD PROTECTIVE MASK WITH HOOD
- 13) TASK EMF.03.13 DON INDIVIDUAL PROTECTIVE CLOTHING TO MOPP 4
- 14) TASK EMF.03.14 PERFORM BASIC BODY FUNCTION WHILE IN MOPP 4
- 15) TASK EMF.03.15 DECONTAMINATION SKIN AND PERSONAL EQUIPMENT USING THE DECONTAMINATION KIT
- 16) TASK EMF.03.16 EXCHANGE MOPP GEAR
- 17) TASK EMF.03.17 EMPLOY TECHNIQUES OF UNAIDED NIGHT VISION
- 18) TASK EMF.03.17 PLAN FOR CONVOY OPERATIONS
- 19) TASK EMF.03.18 PARTICIPATE IN CONVOY OPERATIONS

METL EMF 05 - BASE OPERATING SUPPORT

- 1) TASK EMF.XX PLAN FOR ADVANCED POWER MANAGEMENT
- 2) TASK EMF.XX PROVIDE ADVANCED BASE POWER SUPPORT
- 3) TASK EMF.XX OPERATE CIVIL ENGINEER SUPPORT EQUIPMENT

- 4) TASK EMF.XX MAINTAIN CIVIL ENGINEER SUPPORT EQUIPMENT
- 5) TASK EMF.XX PLAN FOR WATER DISTRIBUTION
- 6) TASK EMF.XX PROVIDE WATER DISTRIBUTION
- 7) TASK EMF.XX PROVIDE ELECTRICAL DISTRIBUTION
- 8) TASK EMF.XX MAINTAIN BASE OPERATING SUPPORT REQUIREMENTS
- 9) TASK EMF.XX ERECT SHELTERS
- 10) TASK EMF.XX PREPARE A FIELD EXPEDIENT LANDING ZONE
- 11) TASK EMF.XX PROVIDE FIELD GALLEY SERVICES
- 12) TASK EMF.XX PROVIDE PERSONNEL FOR AUXILLARY SECURITY FORCE

## MISSION PERFORMANCE STANDARDS HEALTH SERVICES

### INTRODUCTION

This section contains Mission Performance Standards (MPS) for health services provided by the Expeditionary Medical Facility (EMF) in support of the Marine Corps Air/Ground Task Forces deployed ashore, naval amphibious task force units deployed ashore, and forward deployed Navy elements of the Fleet, Army, and Air Force units in support of expeditionary operations ashore or from the sea-base. The MPS in this section are:

EMF.01 Plan Health Services.

EMF.02 Provide Health Services.

The tasks and standards contained in these MPS are designed to cause EMF health services personnel to consider all aspects of health services. This includes the integration and coordination of their efforts with all logistic capabilities of Combat Service Support (CSS) and the EMF to ensure medical and dental support is provided to all elements of Naval expeditionary operations. These MPS are not a substitute for established procedures or required technique within functional areas but serve as minimal requirements to support Naval expeditionary operations. The tactical scenario may be such that not all tasks are planned for evaluation during the exercise. The evaluator notes, "not evaluated" on the evaluation sheet. Commanders are urged to independently evaluate those areas not reviewed during subsequent training opportunities.

MPS EMF.01 - PLAN EMF HEALTH SERVICES

TASK: EMF.01.01 PLAN FOR HEALTH SERVICES

CONDITION: The Command Element (CE) has received an initiating directive alerting it to participate in operations against a hostile element (TBD based on scenario, i.e., combatant, naturally occurring or man-made disaster, UN Chapter 6 or 7 mission, etc.). These hostile elements threaten friendly forces with conventional or unconventional forces, through destructive or extreme variations in environmental conditions, or indirectly through introduction by regional geo-political influences. The CE has formed a Crisis Action Team (CAT) to conduct Course of Action (COA) analysis and develop strategies and responses to the threat.

STANDARDS: EVAL: Y; N; NE

1. Participate in all stages of operational planning.
2. In conjunction with the CE, provide liaison to the Health Service Support (HSS) section as an EMF element of the Combat Service Support Operations Center (CSSOC) or Logistics Operations Center (LOC).
3. Develop a concept of medical operations in support of the operation plan addressing transition during mobilization and deployment, responsibilities to supported forces (joint and coalition), treatment and hospitalization of the force, patient movement, host nation support, adjunct medical support, liquid blood management, preventive medicine, theater evacuation policy, ancillary medical support, combat stress control, medical logistics, command, control, communications, and automated medical information management systems.
4. Provide medical and logistic support requirements to the EMF estimate of supportability.
5. Promulgate EMF Concept of Employment Appendix to Annex Q, Medical Services, of the Basic Operational Plan.
6. Review provisions contained in Annex (Q), Medical Services, of the Basic Operational Plan in relation to the assigned mission and makes changes where required (METT-T dependent).
7. Coordinate for the integration of medical support units throughout the Forces to insure responsive and adequate treatment of casualties.
8. Coordinate to insure medical support plan (Annex Q) conforms to the scheme of maneuver and reflects the commander's guidance.
9. Prepare alternate plans, in coordination with other operational planners, for the redistribution of medical support resources to meet anticipated changes in the tactical situation.
10. Respond to required missions by planning for the efficient use of health services assets.
11. Coordinate Medical Services Annex (Q) with supporting operational plans.
12. Coordinate with other supporting agencies for non-medical transportation, potable water resupply, liquid waste disposal, hazardous waste disposal, solid waste disposal,

direct support/general support maintenance, rear area operations, support to mortuary affairs, engineer site support, movement control, medical force reconstitution, acquisition and delivery of class VIII supplies from supporting agencies, assistance in movement of medical units, medical and non-medical personnel augmentation, Force Protection, and medical unit site registration.

13. Ensure medical units assigned to deploying units are organized, equipped, supplied, and ready to deploy with the supported unit.

14. Conduct readiness inspections of deploying medical units.

15. Evaluate self-aid and buddy-aid for Sailors, and refresher training for organic and augmented medical personnel prior to deployment.

16. Review procedures for the displacement of medical units, and conduct a staff rehearsal of movement plans in support of the Basic Plan scheme of maneuver.

17. Coordinate the scheduling of mass casualty drills during the rehearsal phase.

18. Review medical logistics readiness, availability, and attainment of durable and consumable medical supply.

19. Prepare plans for redistribution of medical and dental personnel and materiel to other elements.

20. Develop a plan for liquid blood supply in coordination with supporting commands.

21. Assess supplemental medical materiel requirements for Military Operations other than War (MOOTW), e.g., Humanitarian Assistance (HA), Disaster Relief (DR), and Non-combatant Evacuation Operations (NEO).

22. Develop medical logistic and resupply policy and procedures for supported commands based on Joint and Service policy.

23. Plan and provide dental support.

24. Provide assistance in the identification of human remains.

25. Coordinate the disposition of human remains from medical units in accordance with Service policy.

26. Determine medical intelligence requirements for the Area of Operations (AOR) to include available resources within the AOR or geographic region.

27. Provide for the collection of medical intelligence for processing by supporting agencies.

28. Process collected medical information into suitable products for evaluation.

29. Convert collected medical information into medical intelligence products in support of user requirements and health threat assessment.

30. Disseminate Medical Intelligence to subordinate medical activities.

31. Promulgate Force Medical Protection initiatives to the supported Force and monitor supporting initiative programs.

32. Plan for, supervise, and coordinate preventive health measures for the control of communicable disease.

33. Plan for the surveillance and monitoring of environmental threats in the operational area.

34. Coordinate and supervise Environmental Health monitoring programs in support of the Force.

35. Coordinate with Joint and Inter-Service medical staff concerning the plan for medical regulating for inter- and intra-theater medical evacuation.

36. Plan for placement and utilization of Joint and Inter-Service Medical Regulating Teams.

37. Maintain up to date information on available medical regulating assets and medical treatment facilities.

38. Establish reporting mechanisms and networks for medical regulating and medical evacuation.

39. Establish liaison with all medical regulating elements.

40. Coordinate and plan medical regulating with Joint and supported unit medical regulating control assets.

41. Plan for and establishes evacuation stations in accordance with Service policy.

42. Develop the plan for casualty overload at medical treatment facilities.

43. Coordinate supportability of mass casualty treatment and evacuation plan with both supported CSSD/CEES and/or supporting staff agencies.

44. Coordinate casualty-reporting procedures with appropriate staff agencies.

45. Insure casualty evacuation policies are coordinated with supporting Joint medical units and the supported Force.

46. Insure casualty return-to-duty (RTD) policies are coordinated with supporting Joint medical units and the supported Force.

47. Complete the casualty estimate.

48. Develop plans for mass casualty treatment and evacuation.

49. Coordinate with dental activity the assignment of dental personnel to augment medical personnel in the event of mass casualty situations.

50. Plan for treatment of casualties under NBC conditions.

51. Insure medical support of NBC decontamination teams is available to provide initial treatment and stabilization of decontaminated casualties.

52. Plan for the establishment and operation of medical evacuation stations to perform triage functions for decontaminated NBC casualties.

53. Plan for the provision of health services to enemy prisoners of war (EPW), civilian internees (CI), and detained persons (DET).

54. Plan for the provision of health services to formerly captured Allied and U.S. military personnel.

55. Plan for the provision of health services support to Civil Affairs operations through Civic Assistance Programs and civilian refugee support operations.

56. Insure adequate communications support of medical units is provided for in the communication annex (K) of the

operation order and coordinated with the MAGTF Communications-Electronic Officer (CEO).

57. Provide liaison to the Civil-Military Operations Center (CMOC).

58. Liaison with Governmental and Non-Governmental Organizations in support of health services operations.

59. Conduct and monitor medical and tactical sustainment and enhancement training to EMF medical personnel.

TASK: EMF.02 Provide Health Services.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: The EMF CO, dental officer, and other health services support units participate in coordination with the command element medical planners in health services planning during the initial stages of the operation, and are continuing participants throughout the planning process. Deliberate planning includes requesting and using medical intelligence resources and knowledge of external medical support capabilities (e.g., host nation and other Services). The medical/dental SOP should include sections on:

1. Training of non-medical Sailors in self and buddy aid.
2. Training of medical personnel within assigned areas.
3. Litter team training and plan for acquisition of litter teams during surge operations.
4. Functional area cross training to include employment of dental personnel in casualty overload situations.
5. EMF movement, establishment, operation, and displacement.
6. Plan for medical regulating.
7. Casualty overload and mass casualty procedures.
8. Area security procedures and combat skills.
9. Security and accountability of narcotics, controlled substances, and other controlled items.
10. Procedures for class VIII resupply.
11. Plan for liquid/frozen blood requirements.
12. Medical/dental communications requirements.
13. Sanitation and preventive medicine.
14. Procedures for the delivery of nursing care.
15. Procedures for patient administration.
16. Supervision of care delivered by corpsmen.
17. Procedures for reporting friendly casualties.
18. Procedures for EPW casualties (intelligence, security, etc.).
19. Procedures for civilian casualties.
20. Plan for emergency retrograde.
21. Provisions for NBC defense.
22. Pre-deployment medical/dental screening to ensure unit readiness.
23. Post deployment medical/dental screening.
24. Develop and maintain a walking blood bank.
25. Assistance in the identification and handling of remains.

TASK: EMF.01.02 ESTABLISH MEDICAL/DENTAL CAPABILITY

CONDITION: The EMF has displaced into the operations area. Their capabilities will include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Establishes medical elements in the AOR with a triage and stabilization capability.
2. Uses established medical principles and military protocols as the basis for triage.
3. Maintains internal patient flow and accountability.
4. Ensures that during casualty processing, individual NBC defense equipment remains with the casualty.
5. Coordinates an adequate defense perimeter for the EMF.
6. Ensures that external markings required by the Geneva Conventions are present and appropriately displayed on all medical assets and personnel as directed by the MAGTF CE.
7. Disperses equipment and shelters adequately.
8. Provides for proper collection and disposal of medical and infectious waste.
9. Reviews SOPs for all sections of the EMF.
10. Coordinates effective casualty reporting with G/S-1.
11. Demonstrates the medical reception and initial treatment of a casualty contaminated by a biological or chemical agent with the assistance of decontamination teams.
12. Ensures that a mass casualty plan has been promulgated, coordinated, and practiced.
13. Coordinates with appropriate personnel for adequate water supply to support health services operations.
14. Coordinates with engineer support unit and preventive medicine unit to ensure water quality minimum standards are observed throughout the distribution system.
15. Demonstrates medical evacuation capabilities.
16. Demonstrates the ability to relocate or redeploy the medical or dental element to while maintaining essential support.
17. Ensures priority of treatment for patients are based on urgency of the medical or dental condition, not on the patient's status as a friendly or enemy casualty.
18. Provides for procedures and demonstrates adequate documentation of casualty treatment as the basis for quality assurance (QA) evaluation of patient care, thus ensuring continuity of care throughout all echelons of treatment.
19. Establishes an emergency and essential dental capability within the EMF.
20. Liaisons with other deployable preventive medicine capabilities within the AOR for medical surveillance and preventive medicine support.
21. Coordinates with military police to arrange for the collection, evacuation, and treatment of displaced persons who are sick or injured.

22. Coordinates with military police to arrange for the collection, evacuation, and treatment of displaced persons who are sick or injured.

23. Coordinates with the logistic movement coordinator for medical support of lifts of opportunity for routine medical evacuation.

24. Provides for sustainment and enhancement training to support emergency care and tactical operations.

EVALUATOR INSTRUCTIONS: Direct an electrical power failure to test the electrical power failure plan. Simulate a chemical attack to observe decontamination procedures for medical personnel and casualties.

KEY INDICATORS: None.

MPS EMF.02 - PROVIDE EMF HEALTH SERVICES

TASK: EMF.02.01 CASUALTY COLLECTION

CONDITION: The EMF casualty reception section and assigned personnel from the evacuation section are deployed in support of the operation.

STANDARDS: EVAL: Y; N; NE

1. Establishes an evacuation station and coordinates the movement of casualties.
2. Collects casualties, providing administrative control and temporary care, and transfers them to other EMF treatment sections.
3. Demonstrates litter team and medical personnel management during routine and disaster casualty situations.
4. Demonstrates the ability to be request, maintain, and receive Class VIII A and B supply.
5. Demonstrates the ability to task organize assigned capabilities to support evolving EMF missions.
6. Demonstrates the ability to arrange for the deliberate evacuation of casualties by surface or aerial assets.
7. Establishes a medical regulating (MEDREG) communication network and communicates with other elements of the network.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK: EMF.02.02 MEDICAL SUPPLY

CONDITION: The EMF medical logistics element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Ensures medical and dental supplies are present in the triage area and readily available to triage personnel for replenishment.
2. Establishes procedures to effect Class VIII A/B resupply from the medical supporting Service utilizing current Automated Information Systems.
3. Establishes procedures for equipment exchange or replacement between medical and dental supporting logistic detachments.
4. Prepares to deploy Maintenance Contact Teams to medical/dental sections.
5. Provides II echelon maintenance for medical and dental assemblages.
6. Identifies critical supplies and objective levels.
7. Establishes stock objectives/levels for all medical and dental items.
8. Maintains prescribed stockage objectives for all medical and dental consumable and durable supply.
9. Ensure disaster stocks of medical supply and equipment to support mass casualties are identified and maintained.
10. Maintains documents for the accountability of narcotics and other controlled substances.
11. Provides appropriate safeguards against loss, pilferage, and damage of Class VIII supply.
12. Establishes emergency blood resupply storage and distribution, and donor control procedures.
13. Provides operator-level preventive maintenance, checks, and services of medical and dental equipment in the field by utilizing equipment manuals.
14. Safeguards medical and dental consumable and durable supply and equipment against environmental threats.
15. Establish procedures for the disposal of non-functional medical and dental equipment.
16. Establish procedures for the destruction of medical or dental equipment to prohibit enemy use.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK: EMF.02.03 CONDUCT DENTAL SERVICES OPERATIONS

CONDITION: Operational forces have been conducting combat operations. Current EMF dental capabilities are limited to emergency care. The AOR requires a deliberate dental facility.

STANDARDS: EVAL: Y; N; NE

1. Coordinates dental services with the supported Force.
2. Provides trained dental personnel to provide emergency care during casualty overload.
3. Establishes a deliberate dental facility within (8) hours of deployment to the operating area.
4. Demonstrates ability to conduct basic dental treatment procedures in an expeditionary field environment.
5. Demonstrates the ability to request, inspect, unpack, assemble, establish, replenish, maintain, dismantle, and repack Authorized Dental Allowance List (ADAL) consumable and durable equipment and supply.
6. Assists in the identification of human remains.
7. Provides for sustainment and enhancement training to support emergency care.
8. Provides for proper collection and disposal of medical and infectious waste.
9. Demonstrates dental X-ray capability.
10. Conducts Class VIII resupply.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK: EMF.02.04 LABORATORY

CONDITION: The EMF laboratory element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Assembles laboratory equipment and determines baseline calibration within safe operating parameters.
2. Ensures sufficient reagents and other consumables for the performance of instrument calibration are available and maintained according to manufacturer recommendations.
3. Performs hematology procedures.
4. Performs hematocrit determination.
5. Performs cell count.
6. Performs cell differentiation count.
7. Performs prothrombin or partial thromboplastin time
8. Performs fibrinogen determinations.
9. Performs bacterial culture, isolation, and identification procedures.
10. Performs gram stain.
11. Performs parasitology procedures.
12. Performs chemistry procedures.
13. Performs blood gas analysis.
14. Performs electrolyte determinations.
15. Performs enzyme determinations.
16. Performs serum chemistry determinations.
17. Performs serology procedures.
18. Performs complete urinalysis procedures.
19. Performs blood grouping and typing.
20. Performs blood cross-match procedures.
21. Performs collection, processing, storage, and issue of whole blood.
22. Performs liquid and frozen blood management and accountability procedures.
23. Prepares stains and reagents.
24. Perform routine laboratory decontamination.
25. Demonstrates universal contamination precautions technique.
26. Demonstrates the ability to request, inspect, unpack, assemble, establish, replenish, maintain, dismantle, and repack Laboratory AMAL consumable and durable equipment and supply.
27. Establishes and maintains procedures for specimen accession, management, recording, and reporting of laboratory results.
28. Provides for sustainment and enhancement training to support emergency care.
29. Provides for proper collection and disposal of medical and infectious waste.
30. Conducts Class VIII resupply.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK: EMF.02.05 X-RAY

CONDITION: The EMF radiology element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Assembles X-ray unit and diagnostic area for safe operation of equipment, ensuring patient and operator safety.
2. Establishes a shielded film processing area.
3. Ensures sufficient reagents and other consumables for the performance of instrument calibration and film processing are available and maintained according to manufacturer recommendations.
4. Provides adequate clarity and resolution in film development.
5. Establishes adequate expeditionary radiation shielding.
6. Ensures X-ray personnel as indicated by the operating environment wear radiation exposure badges.
7. Inspects film for satisfactory quality.
8. Demonstrates proper technique in patient positioning, exposure, and producing satisfactory X-ray's to support patient treatment.
9. Demonstrates the ability to request, inspect, unpack, assemble, establish, replenish, maintain, dismantle, and repack X-Ray AMMAL consumable and durable equipment and supply.
10. Establishes solution storage and disposal sites.
11. Establishes and maintains procedures for exposed film management and reporting of x-ray results.
12. Provides for sustainment and enhancement training to support emergency care.
13. Provides for proper collection and disposal of medical and infectious waste.
14. Conducts Class VIII resupply.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK: EMF.02.06 PHARMACY

CONDITION: The EMF pharmacy element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Establishes pharmacy operations and dispenses medications to support patient care operations in an expeditionary environment.
2. Ensures medications for issue have current expiration dates.
3. Provides accountability and security of narcotics and controlled drugs.
4. Ensures medications are appropriately packaged and maintained to withstand environmental extremes during transport and storage in the field.
5. Ensures expired medications are properly surveyed and properly destroyed.
6. Demonstrates the ability to request, inspect, unpack, assemble, establish, replenish, maintain, dismantle, and repack Pharmacy AMAL consumable and durable equipment and supply.
7. Ensures issued medications are properly labeled.
8. Establishes and maintains procedures for medication issue management and reporting.
9. Provides for sustainment and enhancement training to support emergency care.
10. Provides for proper collection and disposal of medical and infectious waste.
11. Conducts Class VIII resupply.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK: EMF.02.07 OPERATING ROOM

CONDITION: The EMF operating room element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Demonstrates the ability to request, inspect, unpack, assemble, establish, replenish, maintain, dismantle, and repack Operating Room AMAL consumable and durable equipment and supply.
2. Provides sterile instrument trays from available AMALs.
3. Maintains an aseptic operating environment based on the expeditionary environment.
4. Maintains a sterile operative field.
5. Ensures sterilizers are maintained and in safe operating condition, providing appropriate operator safeguards in an expeditionary environment.
6. Ensures that alternative sterilization methods are available.
7. Assembles, maintain, operate, and service surgical light.
8. Provides adequate lighting with emergency battery-powered back-up lighting.
9. Assembles, maintain, operate, and service OR table.
10. Assembles, maintain, operate, and service electro-surgical apparatus.
11. Assembles, maintain, operate, and service surgical suction apparatus.
12. Assembles, maintain, operate, and service suction apparatus.
13. Establishes secure storage area for combustible, flammable medical gases.
14. Assembles, maintain, operate, and service anesthesia machine.
15. Provide, record, and supervise clinical anesthesia services.
16. Establishes preoperative and surgical recovery area adjacent to operating rooms.
17. Ensures the surgical area contains maintained and serviced resuscitation equipment.
18. Establishes patient monitoring, accountability, and tracking mechanisms throughout the operative phases in an expeditionary environment.
19. Ensures medications for issue have current expiration dates.
20. Provides accountability and security of narcotics and controlled drugs.
21. Establishes and maintains procedures for specimen management and accountability.
22. Identifies critical supply and objective levels.
23. Establishes stock objectives/levels for all medical items.

24. Maintains prescribed stock objectives for all medical consumable and durable supply.
25. Ensure disaster stocks of medical supply and equipment to support mass casualties are identified and maintained.
26. Maintains documents for the accountability of operative procedures.
27. Provides intra-operative care.
28. Provides appropriate safeguards against loss, pilferage, and damage of Class VIII supply.
29. Establishes blood-handling procedures.
30. Provides operator-level preventive maintenance, checks, and services of medical equipment in the field by utilizing equipment manuals.
31. Safeguards medical consumable and durable supply and equipment against environmental threats.
32. Provides for sustainment and enhancement training to support emergency care.
33. Receive soiled items.
34. Process items for sterilization.
35. Decontaminate items.
36. Prepare sponge packs and instrument sets.
37. Wrap, label, and date sterilized items for use.
38. Chemically disinfects special items.
39. Maintain sterile instrument and supply administrative forms and documentation.
40. Prepares operative linen supply
41. Provides for proper collection and disposal of medical and infectious waste.
42. Conducts Class VIII resupply.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK: EMF.02.08 PROVIDE PATIENT STABILIZATION AND HOLDING

CONDITION: The EMF ward element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Establishes a ward to hold and further stabilize casualties.
2. Demonstrates the ability to request, inspect, unpack, assemble, establish, replenish, maintain, dismantle, and repack Ward AMAL consumable and durable equipment and supply.
3. Prepares casualties for evacuation to other levels of care.
4. Provides administrative control of patients, personnel, and equipment and submit required reports to higher authority according to BUMED policy.
5. Demonstrates litter team and medical personnel management during routine and disaster casualty situations.
6. Establishes procedures for expanding holding capacity in support of casualty overload situations.
7. Demonstrates the ability to task organize assigned capabilities to support evolving Naval missions.
8. Manages ward personnel for 24-hour operations.
9. Coordinates training for augmenting personnel in support of casualty overload situations.
10. Demonstrates the ability to request, maintain, and receive Class VIII A and B supply.
11. Provides appropriate safeguards against loss, pilferage, and damage of Class VIII supply.
12. Provides operator-level preventive maintenance, checks, and services of medical equipment in the field by utilizing equipment manuals.
13. Safeguards medical consumable and durable supply and equipment against environmental threats.
14. Ensures the ward contains maintained and serviced resuscitation equipment.
15. Maintains emergency pharmaceutical kit for resuscitation.
16. Demonstrates basic and advanced resuscitation technique.
17. Initiate laboratory and X-Ray requests.
18. Obtain and submit laboratory specimens.
19. Record and report results of laboratory tests and radiographs.
20. Demonstrates the ability to assess, monitor, and report human physiologic status.
21. Demonstrates the ability to assess, monitor, and report human emotional status.
22. Reviews the medical record.
23. Transcribes physician orders.
24. Acknowledges completion of care, treatments, and medications on physician's orders.
25. Records and reports observations and treatments.

26. Performs nursing care and treatment.
27. Establishes priority and sequences for patient care.
28. Provides general safety measures for patients.
29. Provides and assist with patient's physical activities.
30. Perform treatment procedures.
31. Prepare medication and treatment cards.
32. Administer and record medications.
33. Ensures medications for issue have current expiration dates.
34. Provides accountability and security of narcotics and controlled drugs.
35. Provides emotional support.
36. Provides spiritual support.
37. Provides preoperative care.
38. Provides postoperative care.
39. Demonstrates universal contamination precautions technique.
40. Implements measures to prevent cross contamination in an expeditionary environment.
41. Assemble, maintain, and operate suction apparatus.
42. Assemble, maintain, and operate oxygen administration equipment.
43. Assemble, maintain, and operate bag/valve/mask hand-cycled resuscitator.
44. Assemble, maintain, and operate respirator.
45. Assemble, maintain, and operate electro-cardiograph.
46. Assemble, maintain, and operate physiologic monitor.
47. Assemble, maintain, and operate cardiac defibrillator.
48. Assemble, maintain, and operate suction apparatus.
49. Assemble, maintain, and operate suction apparatus.
50. Provides for proper collection and disposal of medical and infectious waste.
51. Provides for sustainment and enhancement training to support patient care.
52. Maintains patient treatment records.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: The standards listed above are common to all patient care areas of the deployed medical element. These standards are applied to medical elements that possess the applicable treatment capabilities.

TASK: EMF.02.09 FIELD PREVENTIVE MEDICINE

CONDITION: The EMF preventive medicine element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Assesses the EMF AOR for environmental health risks.
2. Promulgates a field preventive medicine plan.
3. Inspects water sources for potability.
4. Sanitizes water sources for human consumption, field mess, or medical activities.
5. Inspects water sanitation at field laundries, shower points, hand-washing stations, and field heads.
6. Inspects berthing habitability.
7. Inspects field mess for compliance with proper food service sanitation.
8. Establishes pest control measures.
9. Demonstrates the ability to request, inspect, unpack, assemble, establish, replenish, maintain, dismantle, and repack preventive medicine and geographic/missions specific supplemental AMAL consumable and durable equipment and supply.
10. Demonstrates universal contamination precautions technique.
11. Provides for proper collection and disposal of medical and infectious waste.
12. Provides for sustainment and enhancement training to support emergency care.
13. Maintains Preventive medicine records, performs surveillance, and reports observations.
14. Conducts training on personal protective measures for the EMF.
15. Identifies requirements for additional Preventive Medicine technical assistance to support the mission.
16. Collects, assess, manage, report, and disseminate medical intelligence to higher authority and EMF.

EVALUATOR INSTRUCTIONS: None.

KEY INDICATORS: None.

TASK EMF.02.10 PATIENT MOVEMENT

CONDITION: The EMF patient movement element has been deployed to the operations area. The EMF capabilities include triage and holding capability, operating room, pharmacy equipment and supply, laboratory, x-ray, blood banking, ward, and emergency dental capability.

STANDARDS: EVAL: Y; N; NE

1. Identify theater evacuation policy
2. Coordinate bed assets for EMF facility
3. Integrate EMF's patient evacuation plan into TPMRC's deliberate patient movement/evacuation plan

4. Operate C4I systems for patient movement/regulation
5. Develop medical regulating communications requirement for the operation
6. Assist in the development of medical regulating and patient evacuation appendices
7. Establish procedures for the medical regulating network
8. Provide liaison or augmentation to the J/TPMRC

2. Plan for integration into existing C4I systems for patient movement.
3. Plan for utilization and management of patient movement items.
4. Establish procedures for liaison with local Aeromedical Evacuation Liaison Team (AELT) and Mobile Air Staging Facility (MASF)
5. Establish liaison with Joint/Theater Patient Movement Requirements Center (JPMRC/TPMRC)
